### **IOT BASED SMART WEARABLE POSTURE DETECTION, ALERT & HEATING COOLING THERAPY SYSTEM.**

This project continuously monitors a user spinal posture, detect harmful or poor posture in real time, and provide corrective feedback.

The system integrates therapeutic functionalities, specifically localized heating and cooling mechanisms, designed to alleviate muscle strain and discomfort associated with sustained improper posture or physical fatigue. The wearable device continuously collects posture-related data and transmits it via an IoT communication protocol to a companion mobile or web-based application. This platform enables users to visualize posture trends, analyse historical data, and receive data-driven health recommendations aimed at improving musculoskeletal wellness.

Thanking You.

Regards

  
SONALI PATIL (HR)
